### About me:

Dual EU/Venezuelan citizen (Italian National), Full-Stack Engineer, and MSc in Business Analytics candidate at DCU Business School. 5+ years of experience in scalable web architectures, modernizing legacy systems, and data-driven solutions. Proven expertise in database optimization, analytics dashboards, and bridging technical infrastructure with business strategy

---

### Education

**Dublin City University** – Dublin, Ireland  
MSc In Business Analytics

Sep 2026

**Universidad Central de Venezuela** - Caracas, Venezuela

Bachelor in Computer Science

Jul 2018

Thesis title: Business Intelligence Solution based on a Big Data architecture for the Web Archive of Venezuela.

---

### Employment Experience

**Akdemia** - Caracas, Venezuela

**Full Stack Developer**

Sep 2021 – Ago 2026

- Led a full-scale architectural overhaul of the Collections reporting module, utilizing advanced prompt engineering and LLM-assisted logic to modernize legacy codebases. Systematically decoupled core components to resolve UI inconsistencies, optimizing total page load time from 90 seconds to 2.4 seconds (a 97.3% improvement) and establishing a robust, scalable framework for future data expansion.
- Architected an automated bulk-loading system and life cycle management module to resolve student data discrepancies. Resulted in seamless billing operations for 92 schools and a drastic reduction in time-to-value for new clients by streamlining the initial onboarding and data migration phases.
- Spearheaded the integration of QA protocols and visual verification within the development lifecycle using Jira and GitHub. By institutionalizing standardized documentation and support scripts, mitigated production errors and streamlined incident response, resulting in higher system uptime and seamless team handovers.
- Pioneered the development of integrated analytics dashboards that synchronized scattered academic records into a single source of truth. This initiative enabled real-time monitoring of student performance, allowing directors to identify academic vulnerability and early-stage dropout risks with unprecedented speed and precision.
- Developed an end-to-end management system that automates account enforcement based on payment status while centralizing school categorization. By integrating real-time financial monitoring and comparative enrollment metrics, the system facilitated the early detection of dropout trends and provided actionable insights into student population fluctuations.
- Mentored two specialized research initiatives on Data Lake implementation and data lifecycle management in partnership with UNIMET. Both theses received Special Graduation Honors, delivering scalable data architectures and strategic insights that directly enhanced the organization's business intelligence capabilities.

**Tecnisistema Lanwork Place** - Caracas, Venezuela

**Front End Developer**

Nov 2018 – Jul 2021

- Directed the conceptualization and development of dual corporate web architectures for Tecnisistema and Tecnicargo. By aligning technical implementation with brand strategy, delivered a professional digital interface that maximized market exposure and optimized the customer intake funnel.

**Universidad Central de Venezuela** - Caracas, Venezuela

**Intern**

Apr 2016 – Jul 2016

- Digitized student registry operations by developing the SIGEDRE system, featuring high-level user management and administrative oversight modules. The implementation successfully replaced manual tracking with an automated framework, maximizing operational efficiency and providing a unified structure for institutional data governance
-

### **Additional Interests and Achievements**

- **Academic Teaching Assistant:** Selected by the Computer Science department at Universidad Central de Venezuela to mentor undergraduate students in interface design, usability heuristics, and user experience fundamentals.
- **Language:** Native in **Spanish**, professional proficiency in **Italian**, and advanced **English**
- **Sustainability & Environmental Awareness:** Led a campus-wide paper recycling initiative at **UCV** via a digital awareness campaign, driving a 35% increase in student participation and community engagement.
- **Community & Discipline:** Active participant in local **indoor cycling** community events, focusing on physical endurance and stress management through music-driven high-intensity training.
