About me:

Dual EU/Venezuelan citizen (Italian National), Full-Stack Engineer, and MSc in Business Analytics candidate at DCU Business School. 5+ years of experience in scalable web architectures, modernizing legacy systems, and data-driven solutions. Proven expertise in database optimization, analytics dashboards, and bridging technical infrastructure with business strategy

Education

Dublin City University – Dublin, Ireland

MSc In Business Analytics

Jun 2027

- Key Coursework & Competencies: Machine Learning & Advanced AI, Statistics & Data Visualisation, Big Data Analytics, Data Mining & Modelling, Corporate Strategy & Strategic Leadership.

Universidad Central de Venezuela - Caracas, Venezuela

Bachelor in Computer Science

Jul 2018

Thesis title: Business Intelligence Solution based on a Big Data architecture for the Web Archive of Venezuela.

Employment Experience

Akdemia - Caracas, Venezuela

Full Stack Developer

Sep 2021 – Ago 2026

- Led the architectural overhaul of the Collections reporting module using prompt engineering and LLM logic, decoupling core components to reduce page load time from 90s to 2.4s (97.3% improvement).
- Architected an automated bulk-loading and lifecycle management system for 92 schools, resolving data discrepancies and drastically accelerating new client on-boarding.
- Spearheaded QA protocols and visual verification in the development lifecycle using Jira and GitHub; standardized documentation and support scripts to reduce errors, streamline incident response, and ensure seamless team handover.
- Built integrated analytics dashboards to centralize student records, enabling real-time tracking of academic performance and early dropout risks.
- Automated payment enforcement and centralized school categorization to provide real-time population and enrollment metrics.
- Mentored two UNIMET research theses on Data Lakes and data lifecycles, both receiving Special Graduation Honors.

Tecnisistema Lanwork Place - Caracas, Venezuela

Front End Developer

Nov 2018 – Jul 2021

- Directed the conceptualization and development of dual corporate web architectures for Tecnisistema and Tecnicargo, delivering a professional digital interface that maximized market exposure and optimized the customer intake funnel.

Universidad Central de Venezuela - Caracas, Venezuela

Intern

Apr 2016 – Jul 2016

- Digitized student registry operations by developing the SIGEDRE system, replacing manual tracking with an automated framework for user management and institutional data governance.
-

Additional Interests and Achievements

- **Academic Teaching Assistant:** Selected by the Computer Science department at Universidad Central de Venezuela to mentor undergraduate students in interface design, usability heuristics, and user experience fundamentals.
- **Language:** Native in **Spanish**, professional proficiency in **Italian**, and advanced **English**
- **Sustainability & Environmental Awareness:** Led a campus-wide paper recycling initiative at **UCV** via a digital awareness campaign, driving a 35% increase in student participation and community engagement.
- **Community & Discipline:** Active participant in local **indoor cycling** community events, focusing on physical endurance and stress management through music-driven high-intensity training.
